

Youssef Yammine

Beirut, Lebanon - yyammine@hotmail.fr - [linkedin.com/in/yyammine](https://www.linkedin.com/in/yyammine) - github.com/lebenebou

Profile

Problem solver at my core; with an unmatched passion for engineering, code, automation and design.

Experience

Murex SAAS FinTech - Software Engineer (Full-time) June 2024 - Present

- C++ development for the MX.3 platform. Worked in agile teams to deliver features and fix client-reported bugs.
- Enhanced regression testing and increased code coverage percentage using the GTest C++ Framework.
- Created a Linux command-line tool for developers to optimize the continuous integration workflow.
- Transformed legacy GUI code into an object-oriented framework emphasizing modularity.

Murex SAAS FinTech - Software Engineer (Part-time) October 2023 - June 2024

- Designed and implemented a C++ logging library for better log clarity and visual representation.
- C# desktop application development: worked on an internal desktop application to automate the developer workflow and simplify the use of legacy version control systems.

Murex SAAS FinTech - Software Engineer (Internship) July 2023 - October 2023

- C++ legacy modernization for the MX.3 platform. Refactored legacy containers written in C into containers from the C++ standard library (STL), with a focus on efficiency.
- Addressed both functional and performance regressions. Added test coverage to previously uncovered code.
- Wrote automation scripts for static code analysis and file modification in bulk for better code quality.

Freelance Software Developer October 2021 - May 2023

- Developed automation bots for GUIs or web application quality assurance (QA) using Python.
- Created Linux automation scripts which monitor servers, complete tasks at fast speeds or run indefinitely.

Education

Master's degree in Software Engineering - University of Saint Joseph (USJ) - Beirut 2019 - 2024

Relevant courses taken:

- Data Structures & Algorithms – Object-oriented Programming (OOP) - Software Design Patterns

Language Proficiency

Arabic (Native) – English (Fluent) – French (Conversational/Intermediate)

Skills & Abilities

- Proficient in C, C++, Python, C# & Java
- Git, Perforce, Vim, Vs Code, Visual Studio
- Linux bash command-line & bash scripting
- Back-end Development
- Competitive Programming
- Technical & non-technical keynote speaking

Honors and Competitions

COMPETITOR IN THE LEBANESE COLLEGIATE PROGRAMMING CONTEST (LCPC)

2022
